

Would you like
your meat
raised without
antibiotics?

The following California restaurants are among those that have taken action to transition away from serving meat raised with antibiotics. The more antibiotics are overused, such as in the production of meat, the more bacteria become resistant to the drugs. Thus, strong raised antibiotic-free policies from restaurants will help ensure that we preserve antibiotics for generations to come.

BurgerFi
Hamburgers,
Hot Dogs

Carl's Jr.
The All-Natural
Burger

Cosi
Chicken
