Fiscal Year 2022

# For a greener New Jersey

**A 100% Clean Energy Future**

## A letter to our supporters

*Amid a surplus of crises, restoring the natural world to health is humanity's most profound challenge. Defending the environment requires of advocates and activists an ample supply of focus, ingenuity, grit and perseverance.*

*In the past year, Environment New Jersey staff, supporters and allies put these attributes to work on multiple campaigns, raising public awareness, earning popular support, and winning pro-environment changes to public policies and corporate practices.*

*The results include parks and other special places gaining protection from conservation funding we secured through the Great American Outdoors Act. They include solar panels and wind turbines sprouting across the land (and sea), facilitated by federal tax incentives we won.*

*Are these victories permanent, complete solutions to our conservation and clean energy problems? Of course not. But in this polarized time, incremental steps offer a path forward—often the only one. Hence—we persevere.*

*Your action and support are the sparks that transform our research, advocacy, organizing and resolve into tangible results for a greener world. Onward and upward.*

**Doug O'Malley**  
State Director

At Environment New Jersey, our mission is to work for clean air, clean water, clean energy, wildlife, open spaces and a livable climate.

But we can't do it without you. Our staff research the issues, educate the public, and advocate tangible results for a greener world. Our members give us the resources to carry out our mission and put grassroots support behind all of our campaigns and programs.

To keep up to date with our work and learn more about our campaigns and progress, you can follow us at the addresses below. We'd also love to hear from you—feel free to email us at [info@EnvironmentNewJersey.org](mailto:info@EnvironmentNewJersey.org)

# 1 in 3

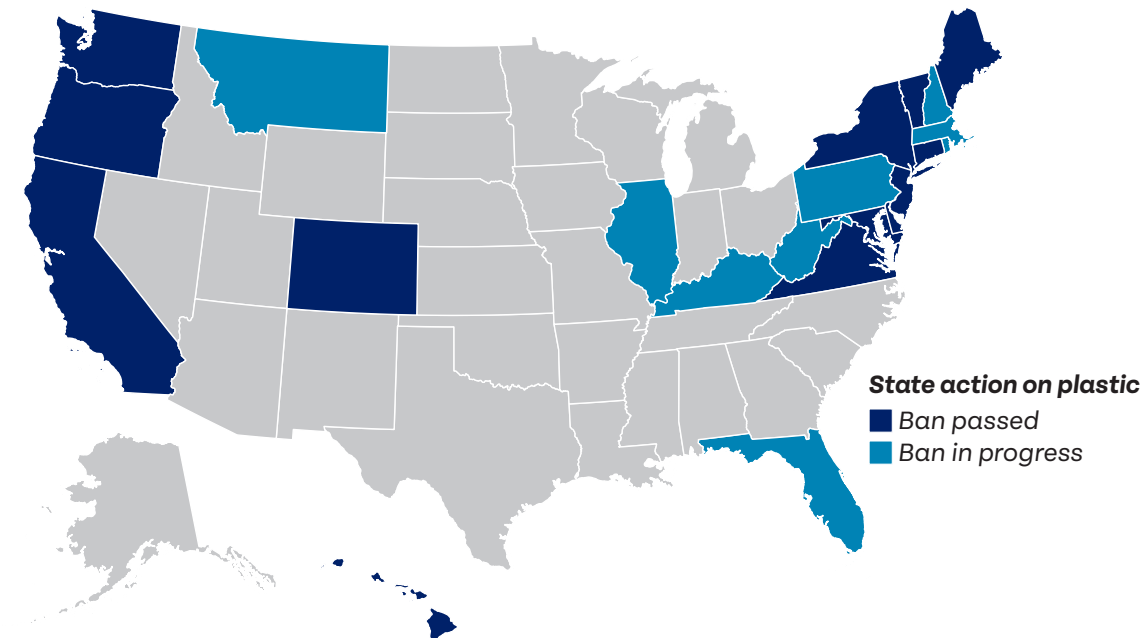

## WILDLIFE OVER WASTE

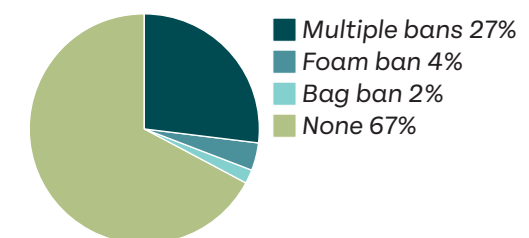

### One-third of Americans now live in states with plastic bans

By mid-2022, 1 in 3 Americans was living in a state with some form of single-use plastic ban. Through our Wildlife Over Waste campaign, members and staff of our national network have contributed to that total, helping to win ban after ban on plastic grocery bags, polystyrene foam cups and more.

We're also spurring companies to take responsibility for their plastic packaging—before it finds its way into our rivers and ultimately our oceans, where it harms and even kills wildlife. Our supporters have called on Whole Foods to lead the grocery industry in removing or replacing the single-use plastic packaging on its shelves.

Percent of U.S. population in states that currently have a ban on some types of single-use plastics.

## CLEAN WATER & AIR

### PennEast drops its dangerous pipeline plan

What do 235 New Jersey waterways and 4,300 acres of preserved lands in the state have in common? They are now safer, thanks to the withdrawal of plans to build a 116-mile gas pipeline.

Even after the U.S. Supreme Court allowed the PennEast Pipeline Company to use the eminent domain process to seize land in 2021, Environment New Jersey Research & Policy Center and our allies continued to raise objections to granting the company state permits for its pipeline. And in September 2021, PennEast announced it was dropping the plan, which would have resulted in more than 460 new fracked gas wells and increased fracking water demands by 880 million gallons.

# Cleaner

## 100% RENEWABLE ENERGY

### More lives will be powered by the sun and wind

Our energy future is looking brighter ... and cleaner. Thanks in large part to victories that our staff and members have helped to win at both the state and federal levels, our country gets more than three times as much energy from the sun, wind and Earth as it did a decade ago, and all 50 states are seeing clean energy growth.

Through our 100% Renewable Energy campaign, our members and staff are calling on more state officials, more local officials, more companies, and more colleges and universities to commit to repowering themselves with clean, renewable energy.

Staff

In 2022, Environment New Jersey Research & Policy Center and our coalition launched the Let Trees Grow campaign to protect older trees from logging. By Earth Day, we had our first win: President Joe Biden ordered federal agencies to inventory and develop policies to protect mature and old-growth forests on federal lands.

anatoliy\_gleb via Shutterstock

In October 2022, our research partners at Environment America Research & Policy Center released “Renewables on the Rise 2022.” Among the report’s findings: America now gets three times as much energy from the wind, sun and Earth as we did in 2012, with growth in all 50 states.

Public Domain

Environment New Jersey-backed bills to help wildlife saw progress. In 2021, Congress approved \$350 million in funding for wildlife corridors to connect fragmented habitats. In 2022, the U.S. House passed the Recovering America’s Wildlife Act, which would offer funds for 50,000 at-risk species.

In 2017, the Trump administration shrank two national monuments in the West and removed protections for one in the Atlantic Ocean. More than 500,000 supporters of our national network objected and the Biden administration listened, restoring all three national monuments.

Staff

Our supporters sent 25,000 petition signatures to Amazon urging it to stop selling bee-killing neonicotinoid pesticides and another 23,000 petition signatures urging the Biden administration to reinstate a ban on the use of neonics in wildlife refuges—safe havens for bees.

After 13 years of litigation brought forward by National Environmental Law Center and our state partners at Environment Texas, a federal judge once again ruled that ExxonMobil must pay the largest civil penalty of its kind for 3,651 instances of illegal air pollution at its oil refinery in Baytown, Texas.

Environment New Jersey is part of the Environment America network. Together, we have a long legacy of victories for clean air, clean water, clean energy and more—including state and local wins that have provided blueprints for action nationwide.

**2007: 5 states join regional climate pact**

Environment Massachusetts, Environment Maine, Environment New Hampshire, Environment New Jersey and Environment Rhode Island help convince their states to join the Regional Greenhouse Gas Initiative (RGGI)—a climate program that cuts power plant pollution.

**2011: Nation sets first mercury coal standards**

Environment America helps win the first nationwide standards for limiting mercury from coal power plants. The Mercury Air and Toxics Standards go on to reduce mercury emissions from coal-fired power plants by 86%

between 2011 and 2017.

**2012: We help secure national clean car standards**

Environment America plays a key role in securing new national clean car standards equivalent to 54.5 mpg that will make super-efficient cars the norm by 2025. This win sets automakers on a path toward improving fuel efficiency across their fleets and even helps usher electric vehicles into the mainstream.

**2012-2014: 4 states spearhead local plastic bag bans**

Between 2012 and 2014, Environment Oregon, Environment California,

Environment Rhode Island and Environment Washington help pass bans on single-use plastic bags in various municipalities and counties. California passes the nation’s first statewide plastic bag ban in 2014, and nine more states follow suit over the next eight years.

**2015: Clean Water Rule finalized**

Environment America helps win the Clean Water Rule, restoring federal Clean Water Act protections for half the nation’s streams, which help provide drinking water for 1 in 3 Americans. Environment America has since worked to uphold the promise of the Clean Water Act by defending hard-won protections from attacks.

**2017: Environment Florida wins toxic wastewater settlement**

Environment Florida wins a settlement against the world’s second-largest chicken producer, Pilgrim’s Pride, over its discharges of toxic pollution into the Suwannee River. As part of the settlement, the company agrees to upgrade its pollution control equipment.

**2018: Giant leap as California goes for 100%**

In September, as Environment California’s Dan Jacobson looks on, Gov. Jerry Brown signs Senate Bill 100 into law. The bill commits the world’s fifth-largest economy to 60% renewable electricity by 2030 and

100% zero-carbon electricity by 2045.

**2020: U.S. military phases out PFAS use**

Environment America helps win a law compelling the military to phase out its use of firefighting foams containing toxic PFAS chemicals, which have contaminated drinking water in communities across the country.

**2020: Conservation gets \$900 million annually**

After winning the permanent reauthorization of the Land and Water Conservation Fund (LWCF) in 2019, Environment America wins full

funding of \$900 million annually for the LWCF the following year. It’s the nation’s most effective conservation and recreation law, putting billions of federal dollars into national and local parks, playgrounds and trails across the country over the last 50 years.

**2021: PennEnvironment helps win waste cleanup lawsuit**

PennEnvironment wins a lawsuit against PPG Industries, forcing the company to clean up soil and water contamination at its waste site in Ford City, Pennsylvania. The suit was first filed in 2012 over ongoing Clean Water Act violations that polluted the neighboring Allegheny River.
