## Introduction

GAS AND ELECTRIC UTILITIES distribute energy to Maryland homes under a state-granted monopoly. These companies are able to pass costs on to energy consumers without fear of losing business to competitors.

For investor-owned utilities, this means stable, consistent return on investment. In return for this advantage, regulated utilities have an obligation to serve the public good by providing safe, affordable, and reliable utility service.

Because they have no market competition for the distribution of energy to our homes, utilities are regulated by the state, with the legislature and the Maryland Public Service Commission overseeing the companies' operations and approving the costs they charge their ratepayers as well as the authorized rates of return on their investments. This places our utilities in a unique position in which the state has direct control over how much profit they are authorized to deliver to their shareholders. This dynamic makes utilities' political dealings more vulnerable to corruption or the perception of corruption in the public's eye. It's therefore of utmost importance that utility activities designed to influence the actions of decision-makers and public opinion happen with clear guidelines and with robust transparency in the decision-making and ratemaking process.

Our utilities are at a time of transformation in Maryland and across the country. As the state navigates the transition off of fossil-fueled home heating towards highly efficient electric alternatives powered by renewable energy, our gas utilities are facing the potential of partial or full retirement and our electric utilities will need to adapt over time to manage the adoption of renewable energy resources and the increasing electrification of transportation and homes.

We need our utilities to focus on their core mission of providing the public good with reliable power. When our decision-makers debate public policies that impact our utilities, we need utilities at the table to share their expertise and opinions on how best to meet their charter obligations. However, in addition to providing this input, our investor-owned utilities may also be engaging in lobbying and other activities meant to influence policymakers and public opinion in ways that serve their bottom line, sometimes at the expense of the public interest. It's not always easy for decision-makers or the public to navigate these dynamics. Regulators, like those at the Maryland Public Service Commission, have expertise in these issues and a focus on overseeing regulated utilities. Legislators are less likely to have such a level of expertise, but deal with policies impacting utility regulation as part of the many bills that cross their desks every year.

This white paper takes a look at the scale of direct lobbying by regulated utilities, as well as other activities that can be reasonably categorized as intended to shift public opinion and influence decision-makers. By understanding what kinds of activities regulated utilities engage in to directly influence policy or shape public opinion, Marylanders, regulators, and decision-makers can arm themselves with the facts that will allow them to hold regulated utilities accountable for staying focused on the public good.

# Understanding Regulated Utilities in Maryland

#### THERE ARE FOUR MAJOR ELECTRIC

UTILITIES which supply electricity to Maryland homes, as well as a set of electric cooperatives and municipal electric utilities. In addition, there are three major gas utilities, as well as smaller, for-profit and municipal gas providers. All of these utilities are regulated by the Maryland Public Service Commission.

Three of the four largest electric utilities and the largest gas utility are subsidiaries of the Exelon

Corporation–Baltimore Gas & Electric (BGE), Delmarva Power & Light, and Potomac Electric Power Company (PEPCO). The Exelon Corporation is a publicly-traded holding company with nearly \$20 billion in annual revenue and more than 10 million customers. [1] Its subsidiary BGE is Maryland's largest regulated electric and gas utility, and had revenues of nearly \$3.9 billion and net income of \$380 million in 2022. [2]

## Lobbying

ACCORDING TO AVAILABLE FINANCIAL DISCLOSURE FILINGS, Maryland's regulated utilities were active in lobbying members of the Maryland General Assembly during the most recently completed lobbying year.

Utilities spent significant amounts on lobbying, particularly relating to energy, the environment, decarbonization, decommissioning of power plants, and the implementation of the Climate Solutions Now act, Maryland's landmark climate transition legislation.

#### TABLE 1. TOTAL POLITICAL SPENDING BY UTILITY 2023

| Utility  | Total Spending – Lobbying (2022-2023)[3] |
|--|--|
| Potomac Electric Power Company (Pepco)*          | \$647,813                                |
| Baltimore Gas & Electric*                        | \$443,983                                |
| Washington Gas Light                             | \$359,505                                |
| Choptank Electric Cooperative**                  | \$257,694                                |
| First Energy, Inc. (Potomac Edison)              | \$236,680                                |
| Chesapeake Utilities                             | \$96,200                                 |
| Columbia Gas of Maryland                         | \$68,860                                 |
| Easton Utilities                                 | \$60,000                                 |
| Exelon*  | \$22,600                                 |
| Southern Maryland Electric Cooperative (SMECO)** | \$10,896                                 |
| Delmarva Power & Light*                          | \$0                                      |
| Total Spending (2022-2023)                       | \$2,204,231                              |

Amounts spent on lobbying in the most recently completed lobbying year (November 2022 – October 2023).

According to activity reports, top spenders Baltimore Gas & Electric and Pepco, which are both subsidiaries of Exelon Corporation, engaged on more than 50 bills during the 2023 legislative session. Utilities may seek to influence legislation in a number of ways. Lobbyists for regulated utilities may try to influence legislators' thinking on bills perceived to be contrary to shareholders' interests prior to filing. In these cases, there may

be no public record of a utilities' position on a bill. However, in some cases, utilities will go on record seeking amendments to a bill, or outright opposing a bill and seeking to prevent the bill from moving out of a committee.

<sup>\*</sup> Exelon and subsidiaries

<sup>\*\*</sup> These utilities are customer owned cooperatives, without private shareholders.

During the 2023 legislative session, notable bills that regulated utilities engaged on included:

- Maryland Sustainable Buildings Act
- Electric vehicles
- Combined reporting (corporate income taxes)
- Net metering (allows for customers who generate renewable energy, for example, from rooftop solar PV systems, to be compensated by utilities for excess generation))
- Community clean energy equipment
- Energy Efficiency and Conservation Programs
- Clean Trucks Act

- Enforcement of prevailing wage on investor-owned utility projects
- Promoting Offshore Wind Energy Resources Act
- Electric Vehicle Charging Reliability Act
- Community Solar Energy Systems Program and Property Taxes
- Maryland Energy Storage Program
- Electric power reliability standards
- Full list in Appendix B.

Looking at the current disclosure period, which includes the 2024 Maryland General Assembly session, regulated utilities will again be well-represented and active on a wide array of issues.

#### TABLE 2. LOBBYIST REGISTRATIONS BY UTILITY 2024

| Utility   | Individual Lobbyist<br>Registrations*[4] | Subject Matter  |
|---|--|---|
| Baltimore Gas & Electric                          | 22                                       | Energy, Environment, Utility Registration, Business Regulation and Occupations, Workers' Compensation |
| PEPCO   | 22                                       | Energy, Utilities, Electricity<br>Regulation, Environment   |
| Washington Gas**                                  | 8  | Natural Resources – Generally,<br>Energy, Environment, Energy, Taxes                                  |
| Choptank Electric Cooperative                     | 5  | Energy, Environment, Utility Registration   |
| FirstEnergy (Potomac Edison)                      | 4  | Energy  |
| Southern Maryland Electric<br>Cooperative (SMECO) | 3  | Utility Registration, Energy,<br>Environment, State Government –<br>Regulation and Procedures         |
| Chesapeake Utilities                              | 3  | Utility Registration, Energy,<br>Environment, Agriculture   |
| Columbia Gas of Maryland                          | 2  | Utility registration, energy, environment, climate change   |
| Delmarva Power & Light                            | 1  | Energy, public utilities  |
| Easton Utilities                                  | 1  | Energy  |
| Total Individual Lobbyists                        | 71                                       |   |

<sup>\*</sup>Registrations at date of publication

<sup>\*\*</sup>Washington Gas Light Company appears as both "Washington Gas" and "Washington Gas Light" in the MSEC database.

# Advertising Expenses and Trade Association Dues

REGULATED UTILITIES sometimes engage in advertising, communications, and other spending that does not directly lobby elected and other government officials, but instead seeks to sway public opinion on a relevant issue. Some of these expenditures may be classified as "grassroots lobbying" expenditures under the Maryland Public Ethics Law when they seek to influence public opinion about a specific piece of legislation.

Regulated utilities also disclose some of their advertising expenditures in the annual reports they file with the Maryland Public Service Commission, as well as in disclosures they file with the Federal Energy Regulatory Commission (FERC). Expenditures on advertising required to deliver energy to customers can be recovered through rates, whereas promotional advertising and political advertising should not. The law on this, however, is somewhat murky.

#### TABLE 3. ADVERTISING AND TRADE ASSOCIATION EXPENDITURES 2022

| Company        | Reporting Year | General Advertising        | Trade Association Dues    |
|----------------|----------------|----------------------------|---------------------------|
| BGE            | 2022           | \$1,744,923 <sup>[5]</sup> | \$830,075 <sup>[6]</sup>  |
| Delmarva Power | 2022           | \$586,529 <sup>[7]</sup>   | Not disclosed             |
| SMECO          | 2022           | \$434,495 <sup>[8]</sup>   | Not disclosed             |
| PEPCO          | 2022           | \$1,404,879 <sup>[9]</sup> | \$500,000 <sup>[10]</sup> |
| Columbia Gas   | 2022           | \$43,707 <sup>[11]</sup>   | Not disclosed             |
| Total          |                | \$4,214,533                | \$1,330,075               |

Disclosed advertising expenditures for the reporting year 2022

While the specific advertising activities undertaken are not disclosed in public filings with the PSC, evidence of these activities is hard to miss. As one example, BGE recently ran sponsored content in the Baltimore Business Journal in support of its recent multi-year rate case filing at the Maryland Public Service Commission. In the sponsored content piece, as at the PSC, BGE argued that new gas

infrastructure should be part of an "integrated approach" to climate transition—a cost that would fall to Maryland consumers. Similarly, BGE has purchased at least six pieces of sponsored content in the Baltimore Banner, including a version of the same piece it ran in the Baltimore Business Journal, and a related piece charging that "loud and unaccountable voices claim that natural gas has no role in Maryland's energy future."

## Conclusion

#### THE REGULATED UTILITY MONOPOLY has

long been a feature of the American energy landscape and has proven to be a successful means of providing for the public good of reliable, safe, and affordable utility service. As with all such partnerships, transparency and vigilant regulation are of paramount importance to protect the public interest.

As Maryland tackles perhaps its most defining energy challenge since the establishment of the industry in the form of a clean energy transition, this responsibility will be more crucial than ever.
